

The SEBO *air belt* K3: Better Brushing means Better Cleaning!

Deep clean your carpet with a SEBO power head. SEBO power heads are virtually maintenance free, and the electronic overload protection feature extends belt life by automatically shutting off power if a brush roller jam occurs.

Choose the power head for your K3

The SEBO ET-C Power Head

The ET-C power head for the **SEBO *air belt* K3** delivers deep cleaning and durability. The wider L-shaped head allows for optimal cleaning and maneuverability around furniture and under cabinets. The extension side of the head cleans to the edge. Warning lights and brush wear lights are conveniently located on the top of the power head. Instead of a brush roller, the ET-C uses a brush strip that slides in and out for fast and easy replacement.

Visit SEBO at www.sebo.us or call (800) 334-6614.

Your SEBO dealer:

The SEBO ET-H Power Head

The ET-H power head for the **SEBO *air belt* K3** includes variable height adjustment and delivers the cleaning effectiveness SEBO customers have come to expect. The patented new design offers dual edge-cleaning and a manual brush control for optimal cleaning from one type of flooring to another. The steering mechanism built into the swivel neck helps you to clean easily around obstacles.

SEBO Warranty

The SEBO *air belt* K3: Power at your fingertips.

The power control slider takes the suction power from 0 to 1250 watts.

The design of the **SEBO *air belt* K3** allows for quick and convenient connection of telescopic tubes, accessory cleaning heads and on-board tools. The handle also includes a power control slider that adjusts the suction up or down for normal to more delicate cleaning tasks.

Performance

The SEBO *air belt* K canisters: Design innovation - compact, lightweight, powerful.

Innovation shows in every aspect of the design of the K-Series canisters, from the *air belt* bumper system to the clever tool storage and easy bag change. These vacuums are light and compact, yet durable and powerful.

Modern technology, state-of-the-art design and consistent customer focus are found in all SEBO products. Try a SEBO canister vacuum cleaner and you will be impressed by the outstanding cleaning power, quiet operation, its first-class filtering system and, of course, ease of use.

Special features of the SEBO *air belt* K-Series Vacuums:

- Light and compact, making it easy to operate and store.
- Powerful performance
- Quiet operation
- Durability - SEBO canisters are made to last
- FULL-SIZE, on-board tools
- Rubber coated wheels prevent damage to floors and rotate 360° for easy maneuverability
- Quick-release for ease of brush head change
- Large control switches for power & cord retractor
- High-quality telescopic tubes that provide convenient handle-height adjustment
- 26-foot operating range

Room-to-room cleaning is easy and convenient with the light and compact SEBO *air belt* K-Series vacuums.

The SEBO *air belt* K-Series vacuums deliver powerful, effective cleaning on all floor surfaces.

Choose from two high-power models:

The SEBO *air belt* K2 is a straight-suction vacuum equipped with the versatile Combination Nozzle for use on both hard floors and carpet.

The SEBO *air belt* K3 includes an electrified telescopic tube designed to accommodate the optional ET-H or the ET-C power head, for thorough brushing and optimal cleaning of your carpet. It also offers suction control at the handle and the Parquet Brush for hard floors.

Parquet Brush
standard accessory tool for the K3, optional tool for the K2.

Turbo Head
optional accessory tool for the K-Series.

Combination Nozzle
standard accessory tool for the K2.

SEBO *air belt* K2

SEBO *air belt* K3

The SEBO *air belt* K: one-of-a-kind extras.

The 3-step filtration system:

First, the three-layer filter bag (a) collects the vast majority of the debris.

Then, any remaining particles are collected by the hospital-grade microfilter (b).

Finally, the micro-exhaust filter (c) cleans the exhaust air that the vacuum emits. The *air belt* (d) disperses the filtered exhaust air around the canister which provides a quiet, gentle air flow.

The S-class filtration system, as described above, results in 99.9% effectiveness to 0.3 microns*, making the SEBO *air belt* K vacuums the perfect choice for customers with allergies and asthma. A charcoal microfilter is available for odor removal.

*Measurement SLG/Chemnitz
SEBO uses only fiberglass-free filters.

Easily accessible, full-size attachments

On-board attachments for the K-series include the dusting brush, the crevice tool and the upholstery nozzle.

**Soft textile
air belt
shock absorber!**

The *air belt* acts as a bumper guard. The soft foam bumper with its durable covering protects your furniture, walls and vacuum from damage.

Replacement *air belt* covers

Personalize your canister with a replacement *air belt* cover available in a variety of patterns and colors.

Pattern 10 is the standard *air belt* cover provided with your canister.

Ergonomic handles

The SEBO *air belt* K handles are ergonomically designed and positioned to reduce wrist and arm fatigue. The K3 handle is even more elaborate with an additional swivel built into the handle.
